

MAJOR CHANGES FOR COLLECTION GARBAGE AND RECYCLABLE MATERIALS

Starting September 1st, a wheeled bin, green or black, with a volume of 240 or 360 litres, will be mandatory for household waste.

The collection of household waste (garbage) and recycling will now be done on Friday for the entire Municipality. Alternately, one week out of two following the current order. A new calendar will be distributed by mail soon.

Bulky garbage collection will now be done once a month every last Friday of the household waste collection. The calendar will specifically mention the bulky collection dates.

It is the responsibility of each owner to obtain a proper bin before September 1st, 2018. With the exception of bulky items, only the materials inside the bin will be picked up.

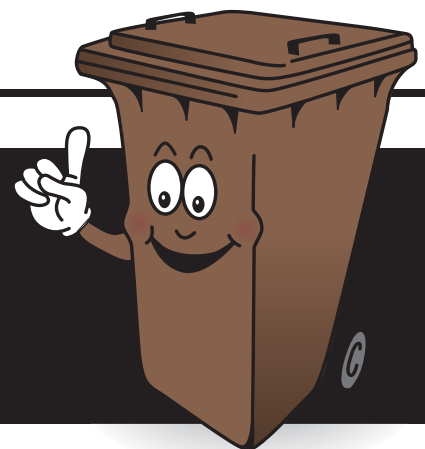

REMINDER – BIN POSITIONING

To allow the collection operations to run smoothly, the wheeled bin must be placed in the entrance and not on the sidewalk or in the street. In addition, the wheels and handles should be oriented towards the home.

THE DISTRIBUTION OF BINS FOR ORGANIC MATERIALS

will take place between August 6 and August 10, 2018. However, the collection of organic materials will not begin until January 1, 2019.

IMPORTANT

Considering the precarious situation of the contractor who currently provides the residual materials collection service to the municipality, some of the changes listed in this document could occur before September 1st. In this extraordinary case, the municipality will notify you through its website, social media (Facebook and Twitter) and by mail.
